About the Author

Mark Raymond Harrington (1882-1971) was one of the pioneers in Cuban Archaeology at the beginning of the twentieth century in a country in which anthropological science began to develop. His studies and findings allowed the development of archaeological studies on the island. At the request of Mr. George G. Heye, director of American Indian's Museum, Harrington went to Cuba on February 1915 with the mission in mind to continue the archeological explorations that Teodoro de Booy left inconclusive. This was the first scientific attempt to study in detail Cuba's first inhabitants and as a result widening of the Cuban archeological register. His main destination was the easternmost Cuban municipality, in the province of Guantánamo, called Baracoa. At one of the sites, he found stone and clay artifacts. Between 1918 to 1919, he explored some caves in the Guantánamo area. His explorations led to him to publish his notes and findings in a work entitled: *Cuba Before Columbus* (1921), published in New York by the Heye Foundation and the Museum of the American Indian. This work was intended to be a two part series of at least three volumes. However, Harrington just published Part I, volumes 1 and 2. In 1935, this work was translated by the Cuban scholars Antonio Mestre and Fernando Ortiz into the Spanish language. The controlled and well registered extensive excavations carried out by Harrington in several locations in Cuba where he collected materials such as seashells, stone and clay items able him to establish a chronology and to determine the cultural stages of Cuba's aboriginal population. This chronology is used up to the present. Today, *Cuba Before Columbus* is an obligatory reference for those scholars interested in Cuba prehistory. Dr. Angel Rodriguez, Editor. Chronicle of archeological excavations in Cuba

By Andy

A somewhat outdated book about the pre-Colombian inhabitants of Cuba, but still a very interesting book for those that are interested in the excavations that took place in the early nineteen hundreds. It reads like a diary so it is somewhat boring as reading material, but it wasn't meant to be anything but a chronicle of the archeological excavations that took place on the island and nothing else. The illustrations are very good.
